Subject: Central Valley Gas Storage Project
Colusa, CA

Dear Tom,

Haskell Corporation would like to express our appreciation to the Farrell team for your hard work and dedication on the Central Valley Gas Storage Project.

From working inside our contract agreement, including the local union requirements, to a professional, safe and expeditious installation of the Geopiers, Farrell Design Build did an excellent job at both of our project sites. Haskell's site team had not previously seen this ground improvement system installed and can now speak highly of Farrell Design-Build and the Geopier system as we look at future projects.

Furthermore, when extra work was added to the project, Farrell provided quick design turnaround and mobilization. This was critical for our project to stay on track and maintain our schedule commitments.

The entire job went smoothly and finished ahead of schedule. In addition, the site was left "clean" as if the Farrell team had not even disturbed the site.

Because of the project's success and Farrell's excellent customer service, we will be looking for future opportunities using your services and will recommend Farrell Design-Build as a foundation solution provider on our upcoming projects.

We look forward to working with the Farrell team on future projects!

Sincerely,

Luke Parham
Project Manager
Haskell Corporation
